DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because 12a, 12b and 12c are not labeled in any figures. Also, it is requested that a cleaner/clearer version of the figures be submitted (more specifically Fig. 2, 3, 4, 5A, 5B, 6B and 9B). Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, 12, 13 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,364,397 to Hayes et al. Hayes discloses as best illustrated in figures 3 and 5 an implant gripping member 22a and 22b, a rod-engaging member 24a and 24b in the form of opposed arms, and a pusher member/actuator 14. Section 30 of the U-shaped member is planar. Element 16 represents the sliding axis.

Claims 1, 2, 7-10, and 12-16 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,202,519 to Hayes et al. Hayes discloses an implant gripping member 14 and 60, a rod-engaging member 80, a pusher member/actuator member 72. Element 42 is a sliding axis.

Response to Arguments

Applicant's arguments filed September 27, 2006 have been fully considered but they are not persuasive. Applicant claims that Hayes et al. ('397) fails to teach or even suggest an implant-gripping member or implant gripping portion as required by claims 1 and 12. As indicated above 22a and 22b are considered to be the implant-gripping member having a distal portion that extends in a direction substantially transverse to a proximal portion. The distal portion is considered to be substantially transverse to the proximal portion because the axis of symmetry of the proximal portion transverses the distal portion (See Figure 1 below). With regard the statement of intended use (e.g. adapted to be positioned under a distal end of a rod-receiving member of a spinal implant) and other functional statements, they do not impose any structural limitations on the claims distinguishable over Hayes which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). Furthermore, the law of anticipation does not require that the reference "teach" what the subject patent teaches, but rather it is only necessary that the claims under attack "read on" something in the reference. *Kalman v. Kimberly Clark Corp.*, 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which

Art Unit: 3733

a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).

Applicant also claims that Hayes et al. ('519) does not teach or even suggest an implant-gripping member. It can be seen in the same way that was described in Hayes et al. ('397) that the implant-gripping member has a distal portion that extends in a direction substantially transverse to a proximal portion.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
